

X-Treme Toyz Tech: Daystar Jeep JK Upper Dash Panel #KJ71020

"TOP THIS!"

2007-'09 Jeep Wrangler Owners know that useable storage space in the vehicle is something you can always use more of. Enter Daystar Products' new Upper Dash Panel. This simple item transforms a useless space on the top of the dash into a functional holder for cell phones, pens, glasses, and any other small item. The installation is simple and takes about 5 minutes. *Why didn't we think of this?*

Gently pry the factory panel up to release the clips.

Lift the factory panel from the dash. Be careful not to damage the compass module wires.

Remove the 2 Philips screws attaching the compass module.

Carefully remove the spring clips.

Re-install the retaining clips and compass module on the Daystar panel and snap back into place.
